

Sound 3300 Oil Eliminator HD

Sound 3300 Oil Eliminator HD is an environmentally-friendly, industrial strength, bio-remediation product. It is a USDA certified biobased product and has earned USDA BioPreferred® designation for Federal Agency preferred purchasing.

Sound 3300 HD uses live bacteria suspended in a citrus-based, non-detergent solution. A proprietary mix of nutrients allows the bacteria to survive in an extremely high concentration for extended periods of time as a 'ready-to-use' product. When Sound 3300 HD is introduced to oily water, sludge, oil-coated surfaces, or contaminated soil, it removes and digests the hydrocarbon contaminants, resulting in a clean, oil-free environment.

Features

- Non-toxic & environmentally friendly
- Deep penetration of product effectively cleans deep stains
- Pleasant citrus smell
- Cost effective

Benefits

- Improves safety for customers & employees
- Safe for users & the environment
- Improves the look of your facility
- Immediate & visibly cleaner surfaces with less downtime
